EDUCATION

Bachelor of Computer Application (BCA)

June 2024 – July 2027

Dayanand Academy of Management Studies, Kanpur

CSJMU, Kanpur

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Development

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript, SQL

Web Technologies: HTML5, CSS3, React.js, Responsive Web Design

Database Systems: Oracle Database, SQL, Database Design & Querying

Developer Tools: Git, GitHub, VS Code, Command Line Interface

Core Competencies: Data Structures & Algorithms, Problem Solving, Object-Oriented Programming, Frontend Development

PROJECTS

Student Management System Web Application | *React.js, JavaScript, HTML, CSS*

- Developed a full-featured web application for managing student records with CRUD operations and responsive UI
- Implemented dynamic data handling and state management using React.js hooks and component architecture
- Designed intuitive user interface with modern CSS styling and mobile-responsive layouts for seamless user experience
- Integrated form validation and error handling to ensure data integrity and improve application robustness

Bank Manager System (CLI) | *Java, Object-Oriented Programming*

- Built a command-line banking application implementing core OOP principles including encapsulation and inheritance
- Developed functionality for account creation, transaction management, balance inquiries, and customer data handling
- Implemented input validation and exception handling to create a robust and user-friendly CLI experience

Personal Portfolio Website | *HTML, CSS, JavaScript, Responsive Design*

- Designed and developed a professional portfolio website showcasing projects, skills, and professional experience
- Implemented responsive design principles ensuring optimal viewing experience across desktop, tablet, and mobile devices
- Utilized modern CSS techniques including Flexbox and Grid for creating adaptive and visually appealing layouts

Authentication Login Web Page | *HTML, CSS, JavaScript*

- Created secure login interface with client-side form validation and user authentication workflows
- Implemented password strength indicators and real-time validation feedback for enhanced user experience

ACHIEVEMENTS & ACTIVITIES

Active Problem Solver: Continuously practicing Data Structures & Algorithms to strengthen problem-solving skills

Self-Learner: Independently learned multiple programming languages and frameworks through online resources and projects

Project-Based Learning: Built multiple real-world applications demonstrating practical application of theoretical concepts

PROFESSIONAL SUMMARY

Motivated BCA student and aspiring Software Engineer with strong foundation in frontend development and programming. Demonstrated ability to build responsive web applications using modern technologies including React.js, HTML, CSS, and JavaScript. Proficient in multiple programming languages (C, C++, Java, Python) with hands-on experience in database management using SQL and Oracle. Actively developing expertise in Data Structures & Algorithms to enhance problem-solving capabilities. Seeking internship or entry-level opportunities to contribute technical skills, collaborate with experienced engineers, and grow in a fast-paced technology environment.
